GIT CHERRY PICK

git cherry-pick commit1 commit2 ....

REBASE

There are 6 actions we can perform on the commits we're rebasing:

- **reword**: Change the commit message
- **edit**: Amend this commit
- **squash:** Meld commit into the previous commit
- **fixup:** Meld commit into the previous commit, without keeping the commit's log message
- **exec:** Run a command on each commit we want to rebase
- **drop:** Remove the commit

Git | Interactive Rebase

Makes it possible to edit commits before rebasing

Creates new commits for the edited commits/ commits which history has been changed
